### Step 2: Choose an Aggressive Adhesive

**ap1**- general purpose adhesive that works well over a wide temperature range. excellent die cutting and stripping

**hp1**- hold strong in severe environments. withstand exposure to petro, grease, organic solvents, high humidity

**crocLock**- the MVP at Pri Plus quick tack properties and excellent on press convertibility

**snappLock**- cylindrical apps and more high initial tack and peel. excellent die cutting to maximize press speeds.

**crocLock-e**- same bite, less ooze. wider temperature range and performs with dirt, debris, and moisture present

**timberTack**- extra aggressive soft adhesive to create maximum contact with application surface

**frzBite**- cold temperature environments. endure a level of condensation and excels in food packaging applications

**tire**- maintain adhesion on rough surfaces excellent initial tack and flow
